## ACADEMIC PROJECTS

### FinancialLift

September 2023

Collaborated in a team of four in a national-level hackathon to design a financial literacy website.

- Our platform is a comprehensive one-stop destination for individuals seeking to enhance their financial literacy and money management skills. It offers a dynamic community forum, curated content, and integrated banking services, all geared toward empowering users to make informed financial decisions and secure their financial future.

### Crowdfunding Application (In progress)

August 2023

Developing a Crowdfunding Application using WEB 3.0.

- The project will leverage cutting-edge Web 3.0 technologies to develop a state-of-the-art crowdfunding application, ensuring enhanced security, transparency, and accessibility for both project creators and backers.
- It will incorporate blockchain features and smart contracts, revolutionizing the crowdfunding landscape by enabling seamless, decentralized transactions while harnessing the power of NLP for intuitive user interactions.

### Linkedin Clone

July 2023

Created a static page that resembles with LinkedIn.

- Assessed various styling conventions for professional Websites.
- Created a replica of linkedin for a particular User with User Interfaces.
- Link : <https://pravinrajnale.github.io/My-Portfolio/>

### Seeds of Hope

March 2023

Collaborated in a team of four in a national level hackathon to design model of UN objectives of Zero Hunger (WEB).

- An Online portal that connects different yet verified NGO's to coordinate with volunteers and donors to achieve Zero Hunger.
- Led the team through various processes in the development from designing to implementation
